EDUCATION

B.Tech in Computer Science Engineering

Government Engineering College Thrissur 2024 - Present Current CGPA (Sem 3) : 9.66

Relevant Coursework:

Data Structures & Algorithms, Operating Systems, Computer Networks, Database Management Systems (MySQL), Object-Oriented Programming, Pattern Recognition

EXPERIENCE

Web Development Intern - ApexPlanet Software Pvt. Ltd. Sep 2025 - Nov 2025

- Built multiple frontend features, including a note-taking web app, an image carousel, and API-based data fetching modules.
- Developed an e-commerce cart system with dynamic product addition, quantity tracking, and price updates using HTML, CSS, and JavaScript.

Content Writer - Tinkerhub GECT

- Created promotional and outreach content for community initiatives and events.

Sep 2025 - Present

PROJECTS

Brailink (Assistive Braille Phone Cover) - ESP Microcontroller, Solenoids, Bluetooth, Android Studio

- Developed an assistive system that converts smartphone text and notifications into Braille output for visually impaired users.
- Built an Android application that reads screen content and transmits characters via Bluetooth to an ESP microcontroller which performs Braille conversion and solenoid control.

Stampede Detector (Real-Time Crowd Analysis) - Python, Fluvio, Groq, OpenCV

- Developed a real-time crowd-monitoring app that detects congestion using webcam input and shades high-density areas.
- Designed a pipeline that processes video frames and highlights high-density regions to identify potential stampede risk areas.

Athenis (Legal Document Simplifier) - Python (Flask), Go Microservice, Akash Deployment

- Built an AI-powered legal document simplifier using NLP, LLM + retrieval-based context augmentation, improving accuracy and contextual relevance.

Local Voice AI Agent - Whisper + Ollama

- Developed a local LLM-based voice agent integrating Whisper for speech-to-text and Ollama for hybrid intent detection, enabling automated code generation, file handling, and summarization with real-time Streamlit UI feedback.

E-Commerce Cart System - HTML, CSS, JavaScript

- Implemented dynamic product addition, quantity tracking, and cart management for a responsive online store UI.
- Worked on frontend development, debugging, and feature testing for dynamic applications.

WhyBot (Useless AI assistant) - React, TypeScript

- An AI chatbot that provides guidance to build a software that solves the problem asked for instead of solving it directly. If not Tech related, it provides philosophical answers.

ACHIEVEMENTS

- Top 3 prizes in project expos at multiple colleges for Brailink
- Top 10 in Open Theme Track at HackOdisha 5.0 (Namespace Community) for Athenis
- Top 15 in Fluvio Track at Hackhazards'25 (Namespace Community) for Stampede Predictor

SKILLS

Programming Languages

Python, Java, C, JavaScript

Web Development

HTML, CSS, React, TypeScript

Tools & Technologies

NLP, LLMs, REST APIs, Ollama, Whisper, Android Studio, Figma, Flask, MySQL OpenCV, ESP Microcontroller

Soft Skills

Leadership, Teamwork, Adaptability, Problem Solving, Perseverance
